

My great experience with SOQI-Zyme.

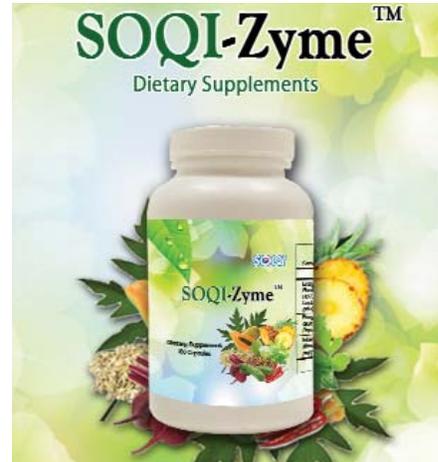

For thirty five years I suffered with eczema on my scalp, eyebrows and chin (constant itching and flaking that was very embarrassing). Also the last ten years, I had developed red spots on my face (on my forehead

and my cheeks around my nose). I was constantly subconsciously aware for both conditions and I have sought the help of skin specialists but without any permanent significant results. I had also a lot of stomach reflex, bloating, indigestion and heartburn after meals until the introduction of SOQI-Zyme in the business.

I immediately started using it (for two and a half months now) and my wife noticed that in four weeks: A) my eczema begun clearing up, and the itching stopped, B) my red facial spots cleared up, and C) I also noticed that after meals I did not have any stomach reflex, bloating, indigestion or heartburn. SOQI-Zyme gave me back my

quality of life. Thank you HTE for this amazing product (another great addition to our product line, and I am excited about it). I constantly promote it to others!!!

My tummy seems to be flatter - less bloating

Hi everyone,

In case you missed the lecture from Dr. Kelly - HTE was kind enough to transcribe it for us due to the detailed scientific information of how important our digestive system is.

There are hundreds of brands of digestive enzymes on the market these days and it can be confusing - however Dr. Kelly has removed the confusion and given us solid information to underpin the importance on the body of complete digestion and explains in detail why our brand is superior and more complete than many others.

I am on my first full week, and have done nothing different except to take the enzyme capsules. I have noticed two things immediately. While the scale has not changed, my tummy seems to be flatter - less bloating. I am more in tune mentally with what is going on inside there rather than just enjoying the taste of a meal. It is making me think, just what value is in the meal I have prepared for myself, my family, or my guests. I seem to

be chewing my food more thoroughly as this also aids in one's digestion. So I want to help my digestive system (myself) from that very first bite. I find that although I do not over eat as a rule, I am a fast eater so slowing down the chewing, I am full sooner, and it is easier to push the plate back. 2 caps taken about 20 minutes before one's larger meals twice a day are the directions. So when I start to prepare my meal I keep that in mind. The full glass of lemon water that I take with the capsules probably helps my digestion as well.

I did find however that since the product is at this time only available from LA, the delivery charges were quite high so next time I order I will be buying it by the case to justify the transport charge of \$25.00.

Please share this with your family.

Enzymes for proper body function

After a tooth extraction my face broke out terribly. I tried numerous products, and even resorted to antibiotics for both internal and external use, and still no results. Between all the doctors I saw I was diagnosed with acne, rosacea, cellulitis, dermatitis, and eczema. At fifty three years old or at any

age those are not conditions one cares to accept as normal. My ears and eyes were open and searching for

help for my complexion problem that several doctors were unable to help me with. After reading a testimony about SOQI-ZYME I knew it was something worth giving a try. I ordered SOQI-ZYME and GO GREEN and began taking those two products with positive results. I don't need to stay home, hide my face and be embarrassed from people seeing me anymore.

Our body's get sick sometimes because we have too much of something that causes an imbalance or because we don't have enough of something needed for proper nutrition. I believe that I may have been lacking enzymes for proper body function. I don't miss a day without my SOQI-ZYME or GO GREEN and the bonus is that I have also lost weight.

SOQI-ZYME & Oatmeal Experiment

Here are the instructions on how to prepare the SOQI-Zyme and oatmeal experiment for your home party or meeting.

Step 1: You will need the following items:

- 2 identical cups or bowls
- 2 capsules of SOQI-Zyme
- 1/3 cup of hot water
- 1 pack of instant oatmeal
- Stirring stick

Step 2: Before the HP/meeting begins, prepare the oatmeal. Use one cup/bowl and mix the oatmeal and hot water together and stir. Let the oatmeal sit for half an hour so you can prepare the rest of the meeting. The oatmeal will get dry on the surface.

Step 3: Start your presentation on the SOQI-Zyme. Show the oatmeal to everyone and divide it evenly into the empty cup/bowl. Mix one of the cups/bowls with 2 capsules of SOQI-Zyme. Carefully open the capsule and put the powder contents into 1 of the cup/bowl.

Step 4: Stir the mixture and you will notice the SOQI-Zyme starts to digest the oatmeal instantly.

Step 5: To create a more dramatic effect, cover the 2 cups/bowls with a tissue paper to reveal the experiment.

Let it sit for another 10-15 minutes and continue with your presentation.

Step 6: After the presentation, remove the tissue so everyone can see the final results. The oatmeal remains sticky and clumped together whereas the oatmeal with SOQI-Zyme has become watery and liquid form.

What an amazing outcome! Everyone will be impressed by the results. You can share your testimonials on the SOQI-Zyme and end the presentation by sharing the special prices on the SOQI-Zyme! Good luck!
